

EXPERIENCE OF THE PAST,
INNOVATION OF THE
FUTURE.

A Bartlett Group Company

EXPERIENCE, INNOVATION, & CONSTRUCTABILITY

At GMTS, our integrity and attention to detail is unmatched in the industry. We realize that a turnaround by nature is a sprint, but we treat it as a relay race. That mentality helps us bring projects in on time and on budget.

MAJOR PROJECTS & TURNAROUNDS

GMTS excels in critical path project work. We specialize in project management, cost control, scheduling, engineering, and mechanical execution for upgrades, revamps and maintenance turnarounds.

- **FCC** — Vessel modifications, heads off, transfer lines, cyclones, slide valve removal and replacement, air grids, expansion joints, structure and drums
- **COKE** — Drum repair and replacement, skirt repair, structure, delta valves, revamps and upgrades
- **CRUDE** — Valves, heater-skin repair, burners, exchangers, vacuum column and drums
- **CRUDE/HYDROCRACKERS** — Piping, torquing and tensioning exchanger work
- **PIPING** — Fabrication and installation

GENERAL & SPECIALTY MAINTENANCE

GMTS consistently delivers projects that exceed expectations, placing customer satisfaction at the forefront.

- Vessel Modifications
- Heads Off
- Transfer Lines
- Cyclones
- Drums
- Air Grids
- Expansion Joints
- Structures
- Slide Valve Removal & Replacement

CRAFTING MECHANICAL SOLUTIONS THROUGH PAST EXPERIENCE, TODAY'S INNOVATION, AND TOMORROW'S POSSIBILITIES.

Our project team is especially competent in project management, innovation, cost controls, scheduling, planning, and engineering.

PROJECT CONTROLS

- Prioritizes stakeholder collaboration and continuous improvement.
- Employs detailed planning, resource allocation, and budget management.
- Proactively manages risks and changes.
- Vigilantly monitors project progress and sharing status reports.
- Maintains robust document control and optimizing resources.
- Conducts post-project reviews for enhanced practices.

QUALITY CONTROL

- Develops project-specific quality control plans.
- Ensures compliance with regulatory, customer, and company requirements.
- Internally generates welding specifications and records.
- Conducts regular audits for quality assurance.
- Offers support for policy and code interpretation.
- Ensuring site inspection compliance and welder stencil management.
- Providing ongoing training to maintain high-quality standards.

ENGINEERING SERVICES

- Specializing in heavy-lift operations and advanced rigging.
- Emphasizing safety, efficiency, and feasibility.
- Using constructability modeling for practical project evaluation.
- Selecting suitable heavy-lift cranes and exploring innovative crane uses.
- Creating comprehensive plans for heavy-lifting and rigging.
- Offering third-party engineering support when needed.

PROJECT CONTROLS

QUALITY CONTROL

ENGINEERING

PERFORMANCE BEGINS WITH A CULTURE OF SAFETY

GMTS' goal is to provide an accident-free workplace for our employees, as well as our clients. Planning safety into each job task helps us identify and mitigate hazards ahead of time to ensure the schedule and budget are not exceeded.

We are proud to create a culture of opportunity, innovation and respect.

SAFETY

GMTS is committed to safety from the management level down to the field execution level.

INTEGRITY

GMTS believes in honesty and doing the right thing, even when no one is watching.

ATTENTION TO DETAIL

From constructability through cost control, GMTS' expertise in project execution helps us identify issues before they become problems.

SELF-MOTIVATION

GMTS has an innate drive to excel and deliver exceptional results in every project undertaken.

TEAM OWNERSHIP OF PROJECTS

GMTS works collaboratively with all parties playing an integral role towards its success.
